**TRIAL BOTTLES FREE.**  
Regular size 50 cents and \$1.00.

## FOR TUBERCULOSIS.

Doctor J. Kornitzer of This City Advocates Electrolytic Treatment.

This theory by far surpasses mine in clearness and definiteness. But admit mine or his or neither as true, the fact stands that a daily application of the Galvanic current to the apices of the lungs checks consumption but not the predisposing diathesis to acquire it; hence, to effect a permanent cure the permanent daily use of the current is required—rare and short interruptions will not matter much.

This is an inexorable requisite but not too high a price for the purchase as eternal vigilance is not too high a price for liberty. It is not to be had cheaper anywhere.

All this I conveyed to the profession in 1892 in the articles mentioned above; but, as I said, to no appreciable avail to physicians or patients either. And this very fact alone goes to irrefutably show that, to freely publish an important remedial discovery in a medical paper only may fully conform to our written ethics; but, as to morality applied, it fully amounts both to criminal disregard toward the help-needy sufferers and to dense stupidity. By acting Simon-pure-like in 1892 I have robbed my heirs of thousands of dollars without in the slightest degree benefitting the talented and thinking among my brethren of the profession. I furthermore opened an opportunity for quacks to cheat the credulous sufferers and, on top of all that, I actually have the deaths of thousands on my conscience.

Of late I was pondering on a legitimate way to vindicate the superiority of my discovery (the electrolytic treatment of tuberculosis) over all other cures (so called) as: Tuberculin, watery extract of tubercle bacilli, guaiacol, Hoff's remedy, cinnamic acid, climate a. s. f. and for this purpose I have taken out a patent on a very handy electric apparatus which to widely advertise is my legitimate privilege, yea, my ethical duty.

This will bring my method of treatment speedily before the public and make it infinitely more available for the multitude. And here is why.

To require a patient to sit down to his battery twice a day for ten minutes is not to ask too much, but much anyhow. For the large majority, however, it is to require the impossible. Travelers and those visiting far away from home; those in serving position in families and stores; laborers who have to hurry to their shops and come home fatigued; those who never learn to keep a common battery in working order and a great many others who out of false shame, are loth to attend to this duty to themselves—all these, I say, are prone to consider the use of the common battery as hardly feasible for them. Such, however, is not the case with my electric body wear, which, pray, don't confound with the "electric belts" in the market.

What I offer is ethically correct and strictly honest to the laity and profession alike, namely:

An electric body wear, yielding a current of sufficient strength to inhibit the action and growth of the bacillus. This done my apparatus can be used all through a long and useful life and thus prevent a return of the disease. Medicines, ever so good, can not be used very long without injury to the system; hence are not available as preventives; and to talk about permanent cures by medicines, hypodermics or electricity in tuberculosis is fraud pure and simple or inexperience simple and pure.

Lately Dr. Chisholm Williams of London described forty-seven cases of pulmonary tuberculosis most successfully treated by electricity.

Had he my twenty years experience in this line of therapeutics he would have added that, to stay cured, those forty patients would have to apply the current all through life.

Whether Dr. Chisholm Williams of London drew from me (many copies of my articles mentioned above went to England) or whether the idea struck his own mind, my priority regarding the electrolytic treatment of tuberculosis and several other therapeutic methods are historically recorded. (See National Cyclopaedia of American Biography, Vol. VII, pp. 51 and 52.)

But in my legitimate vanity, I am bent on seeing with my own seventy-seven years old eyes, what, without these my initiative measures, is sure to be the generally acknowledged treatment ten years after my death.

## How Things Grow In Hawaii.

How great are the possibilities of Hawaii as a fruit and vegetable growing country will be understood when it becomes known that four crops of potatoes have been produced in succession on the same piece of land within twelve months. Radishes become edible in ten days after sowing. Strawberry vines bear fruit all the year. The berries are of the finest flavor.

Cabbage grows all the year, and it apparently makes no difference whether it is planted in the spring, summer, autumn or winter. Parsley once sown grows forever apparently. Lima beans continue to grow and bear for over a year, and they have to be gathered every week after starting to bear. Cucumbers bear the entire year, and so do tomatoes, which, with proper attention, bear for years. Raspberries bear for six months.

Pineapples come into bearing when the plants are four months old and bear in abundance for years. Lettuce can be planted at any time, and it develops quickly. The same is true of celery.—Fruit Trade Journal.

## Saved Her Child's Life.

"In three weeks our chubby little boy was changed by pneumonia almost to a skeleton," writes Mrs. W. Watkins, of Pleasant City, O. "A terrible cough set in, that, in spite of a good doctor's treatment for several weeks, grew worse every day. We then used Dr. King's New Discovery for consumption, and our darling was soon sound and well. We are sure this grand medicine saved his life." Millions know it's the only sure cure for coughs, colds and all lung diseases. All druggists guarantee satisfaction. 50c, \$1.00. Trial bottles free.

## "Thirdly" Was Missing.

Doctor Gordon, who was the first minister of the church in Jamaica Plain, about the year 1771, was a Scotchman, very stern and arbitrary in his manner, and precise and orderly in his own habits. The following anecdote of him is recorded in the family journal of one of his old parishioners:

One Sunday while preaching he had begun to develop his theme with the usual "firstly," and got through that and "secondly." Then turning the leaves of his manuscripts he said: "Thirdly," a second time "Thirdly," and again in great embarrassment, "Thirdly!"

Just then a little girl in one of the front pews stood up and said: "Please, sir, thirdly flew out of the window some time ago."

Candies at your own price at Katzenstein's.

## ECZEMA'S ITCH IS TORTURE.

Eczeema is caused by an acid humor in the blood coming in contact with the skin and producing great redness and inflammation; little pustular eruptions form and discharge a thin, sticky fluid, which dries and scales off; sometimes the skin is hard, dry and fissured. Eczeema in any form is a tormenting, stubborn disease, and the itching and burning at times are almost unbearable; the acid burning humor seems to ooze out and set the skin on fire. Salves, washes and other external applications do any real good, for as long as the poison remains in the blood it will keep the skin irritated.

## BAD FORM OF TETTER.

"For three years I had Tetters on my hands, which caused them to swell to twice their natural size. Part of the time the disease was in the form of running sores, very painful, and causing me much discomfort. Four doctors said the Tetters had progressed too far to be cured, and they could do nothing for me. I took only three bottles of S. S. S. and was completely cured. This was fifteen years ago and I have never since seen any sign of my old trouble."—Mrs. L. B. JACKSON, 114 McGee St., Kansas City, Mo.

S. S. S. neutralizes this acid poison, cools the blood and restores it to a healthy, natural state, and the rough, unhealthy skin becomes soft, smooth and clear.

cures Tetters, Erysipelas, Psoriasis, Salt Rheum and all skin diseases due to a poisoned condition of the blood. Send for our book and write us about your case. Our physicians have made these diseases a life study, and can help you by their advice; we make no charge for this service. All correspondence is conducted in strictest confidence.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

## Tried and Convicted Too.

Politics in the west, even more than in the east, says the author of "Life and Sport in California," is a profession. I remember two men who were candidates for the office of district attorney. One had served before; the other was a young man conducting his first campaign.

The veteran was speaking in a small town, and after setting forth his own claims he spoke as follows of his opponent:

"I understand that Mr. X. is in every sense a worthy and honorable man, but I ask you to remember that he has never been tried—he has never been tried."

"That's so!" exclaimed a voice. "You've been tried, old man, haven't you—and convicted, too, you know?"

After due inquiry it appeared that the veteran had been, indeed, indicted for horse stealing and convicted. He was not elected.

## A Legacy Of The Grip.

Is often a run-down system. Weakness, nervousness, lack of appetite, energy and ambition, with disordered liver and kidneys often follow an attack of this wretched disease. The greatest need then is Electric Bitters, the splendid tonic, blood purifier and regulator of Stomach, Liver and Kidneys. Thousands have proved that they wonderfully strengthen the nerves, build up the system, and restore to health and good spirits after an attack of Grip. If suffering, try them. Only 50c. Perfect satisfaction guaranteed by all Druggists.

## On the Bargain Counter.

A well-known society woman was taking a drive in the park, says the New York Times. The coachman was too lively in his use of the whip, and nearly ran into another vehicle.

"James," said the lady, after they had returned home, "you were very careless to-day. What was your head given you for if not to use?"

"Pardon, mem," replied James. "If I had any head I'd not be workin' for thirty-five dollars a month."

## Do Carpets Shorten Life?

Just think what a horrible receptacle of unclean things the carpet is in the rich English or French house! Where there are carpets, people should on entering be given slippers, as in the Netherlands, or the footbath, as at a Turkish mosque. Making servants sweep carpets is another proof that evil is wrought for want of thought. Flourens attributed the prevalence of lung and throat diseases in England to carpeted rooms.—London Truth.

When you want a physic that is mild and gentle, easy to take and pleasant in effect use Chamberlain's Stomach and Liver Tablets. Price, 25 cents. Samples free. Every box guaranteed. For sale by A. E. Howell, Socorro; W. M. Borrowdale, Magdalena.

## A Bull Movement.

"My operations in this field being checked," said the tramp as the bull approached, "I shall take a little flier in wheat to save myself."

And he soon vanished across the glimmering expanse of waving grain.—Baltimore American.

How Are Your Kidneys? Dr. Hodde's Backache Pills remove all kidney trouble. Sample free. Add: Bleeding Heart Co., Chicago or N. Y.
